

E-File System – Modification Requirement Document (Version 2.0)

Project: E-File Management System

Client: AVFU

Date: 29-07-2026

1. User Login

- For the first login, officials will receive a default password.
- An OTP will be sent to the registered mobile number for verification every time.
- After successful verification, the user must change the default password before accessing the system.

2. Confidential Files

- Confidential files will work exactly like normal files.
- Only a "**Confidential**" tag will be displayed on the file.
- Remove the existing **1:1 forwarding** restriction.

3. New File Creation

Recipient selection should be as follows:

- **Office** – Select2 searchable dropdown.
- **Section** – Select2 searchable dropdown, filtered based on the selected Office.
- **Person/Designation** – Select2 searchable dropdown.
 - Initially, all users will be displayed.
 - After selecting Office and Section, only the corresponding users will be shown.
 - Display format: **Employee Name (Employee Code)**.

Note: Users can directly select a recipient from the user list without selecting Office and Section.

4. Favourite Recipients

- Users can create and manage their own favourite recipient list.

- Favourite recipients can be selected directly while creating the files.

5. File Tag

- Add an "**Other**" option in the File Tag list.
- If selected, display a text box to enter a custom tag.

6. Excel Upload

- Provide an option to upload files in **Excel format**.

7. Attachment Deletion

- Users can delete their own uploaded attachments before forwarding.
- Attachments can be deleted only within **5 minutes** of upload.

8. Confirmation Messages

- Use **Sweet Alert** for all confirmation and success messages throughout the system.

9. Draft File Deletion

- The file creator can delete the entire draft before forwarding.
- Draft deletion is allowed only within **30 minutes** of file creation.

10. Forwarding

- Remove the **Remarks** section during file forwarding.

11. Attachment Preview

- If an attachment is a Microsoft Word document, display it as a **PDF preview**.

12. File Download

Provide the following download options:

- Download individual attachments.
- Download all attachments together as a **ZIP** file.

13. Notesheet

- Provide an option to download the **Notesheet**.

14. My Files

- Display the **File Subject** in the "My Files" list.

Admission Management System (AMS)

Student Registration

- Students will register using:
 - Name
 - Email
 - Mobile Number
 - Password
- After successful registration, students can log in and submit the admission application form.

System Administration

- **Super Admin**
 - Monitors and manages the entire system.
- **System Admin**
 - One dedicated administrator for each individual system.
